Education

National University Laguna

July 2026

Bachelor of Science in Information Technology
Magna Cum Laude

Experience

Data Administrator Intern

Dec 2025 – Apr 2026

National Reinsurance Corporation of the Philippines

- Processed, validated, and maintained financial datasets using Microsoft Excel and Google Workspace, performing data quality checks, resolving inconsistencies, and ensuring data accuracy to support business reporting.
- Improved data processing efficiency by utilizing Excel formulas, lookup and logical functions, and VBA macros, while tracking workflow progress in Google Sheets and collaborating with supervisors to resolve data discrepancies.

Projects

Frontend Lead Developer | Tara4a

Jul 2025 – Oct 2025

- Led frontend development of a tourism website, collaborating with the development team to deliver a responsive and user-friendly interface.
- Identified and resolved frontend issues through QA testing, improving application functionality, browser compatibility, and overall user experience.

Salesforce CRM WhatNext Vision Motors

September 2025 - October 2025

- Developed a Salesforce CRM solution using Apex, Lightning Web Components (LWC), and declarative automation to streamline vehicle orders, dealer assignment, inventory management, and customer engagement.
- Implemented automated workflows, email notifications, and reports/dashboards to improve operational efficiency, order accuracy, and business insights.

Frontend Developer / QA Tester | Geotrace

Aug 2024 – Mar 2025

- Developed frontend components for a web-based geofence monitoring system integrated with Android devices using modern web technologies.
- Performed functional testing, troubleshooting, and issue resolution to improve application stability and usability across web and mobile platforms.

Multimedia Designer | AirSentinel | IoT Conference Philippines 2025

March 2025

- Developed multimedia presentations and technical demonstration materials for project presentation.
- Contributed to the development of AirSentinel, an air quality-focused IoT project recognized as one of the Top 15 Semi Finalist in PacketHACKS x Hack the Climate during the IOT Conference Philippines 2025.

Developer | NUForum

January 2024

- Developed and deployed a web-based discussion platform using AWS EC2 for cloud hosting and deployment.

Skills

- Programming Languages: JavaScript, PHP, SQL, HTML5, Tailwind CSS,
- Frameworks & Technologies: React, Next.js, Laravel, Git, GitHub, AWS, Google Workspace
